

## Gemini Gas Shutoff System

Bulletin: 820.03

The Mercury System features one Terminator actuator and the Gemini System includes two Terminator actuators.

### Features

- Low cost shutoff system
- Actuator installs easily with no special tools
- Fire code approved replacement for gas scrubber system
- Helps to mitigate the impact of HAZMAT gas leak as required by a Risk Management Plan
- All NEMA 4X rated enclosures
- Quickly terminates leak to prevent gas exposure to personnel and community
- Self-contained battery power assures operation, even during a power failure
- Uses 115 or 230 VAC, only to recharge battery

### Available Options

- Relay Interface Module System
- Annual Preventative Maintenance Program

### Applications:

Hazardous Gas Use Facilities  
Water Treatment Facilities  
Wastewater Treatment Facilities

This economical gas shutoff system is available in two configurations as a Mercury or Gemini. When two actuators are used with the system, they will close sequentially. The system will quickly close a gas cylinder valve with a signal from a remote contact button, SCADA System or gas detector system. Requires a Relay Interface Module option if an output signal is required.
